PROFESSIONAL SUMMARY

Results-driven Computer Science student with experience in full-stack development and web application security. My background in elite-level team sports has cultivated a strong work ethic, collaborative spirit, and exceptional problem-solving abilities. Solid experience in Python, Java and JavaScript, with practical knowledge of cloud services and agile development. Eager to apply my skills in a large-scale, influential environment to develop innovative solutions for meaningful problems.

EDUCATION

B.Sc. in Computer Science **September 2024 - Present**
Université de Montréal | GPA 3.95 Montréal, Qc

DEC in Pure and Applied Sciences **August 2021 – May 2024**
Cegep Édouard Montpetit | R Cote 33.1 Longueuil, Qc

WORK EXPERIENCE

Promutuel Insurance **May 2025 – August 2025**
Web developer intern Quebec City, Qc

- Built and maintained front-end components (modals, blocks, custom hooks) in Drupal CMS using HTML, SCSS, Twig, and JavaScript (jQuery).
- Secured web applications by implementing an SSO SAML connection with miniOrange and Azure AD, successfully blocking POST requests and disabling form elements to enhance security
- Managed and configured Google Cloud Platform services, including the integration of reCAPTCHA and Google Maps API, to enhance user experience and security.
- Collaborated in agile teams (SAFe, Scrum) using Jira, Confluence, and Bitbucket, while deploying applications with Docker and Acquia on Ubuntu/WSL environments.

PROJECTS

VeloxQuiz, AI tool for quiz creation et grading | Python, Flutter **December 2025 – Present**

- Developing an AI-powered system for quiz generation and automated grading from PowerPoint files using **python-pptx, Google AI, and OpenCV**, with a **Flutter** mobile/desktop frontend, **FastAPI** backend, and **Supabase** database.

2048 AI bot | Python, PyTorch, Pygame **August 2025 – September 2025**

- Developed a reinforcement learning agent using a Deep Q-Network to beat the game 2048 by utilizing a target network. Learned about reinforcement learning concepts such as MDP components, learning mechanism and strategy & stability techniques for better performance.

TECHNICAL SKILLS

Languages | Python, Java, JavaScript, HTML/CSS, PHP
Frameworks & Libraries | Twig, SCSS, jQuery, PyTorch, OpenCV (beginner)
Developer Tools & Platforms | Git/Github, Docker, DDEV, WSL, Ubuntu, Bitbucket, Acquia, Jira

AWARD AND ACHIEVEMENTS

- 2x Excellence Scholarships – Université de Montréal, DIRO
- 5x Academic Excellence Awards - Top student of the year (high school)
- 2x Leadership and Determination Awards
